

NORDEX EXPLOSIVES LTD

Explosives Experts

Introducing... A Superior Line Of Emulsion Explosives

Nordex has completed construction of a new state of the art emulsion plant at our Manufacturing & Operations facility located near Kirkland Lake, Ontario. The emulsion produced from the plant can be used in mining, quarry, and construction blasting applications. Nordex offers full service solutions incorporating the use of our bulk emulsion trucks, underground loading equipment and dedicated trained personnel. Nordex also consults in the development of blast designs and customized products and services to meet the unique needs of our clients.

Emulsion Products:

Normite V™ Booster Sensitive Emulsion

Normite EV™ Detonator Sensitive Emulsion

Packaged or Bulk

Surface or Underground

Increased Quality: The emulsion is sensitized with microspheres and uses a high concentration of nitrate resulting in superior consistency, stability, and velocity.

Tested and Proven: Designed specifically to meet ERD & CE certification requirements and for use in harsh weather climates and Canadian conditions.

Chosen Over its Competition: Military testing has found it to be superior and more energetic compared to other manufacturers' emulsions.

Manufacturing & Operations: PO Box 790 | Kirkland Lake, Ontario | P2N 3K4 | P. 705-642-3265 | F. 705-642-3266
